Great Outdoors...  
From Home!”

“THE SAFER RAILING SYSTEM”

— BE SAFE —

# Install Quality Time

When you add RailWays® Universal Railing to your wood or composite deck, you can rest easy knowing that you're adding hours and hours of enjoyment in a safe environment. That's because, unlike some railing products that don't even meet the most basic building codes for safety, all Railways® Universal Railings are rated R1 (the highest rating possible) under the International Building Code. In fact, Railways® Universal Railing is tested to withstand 2½ times the strength required by code. Plus, Railways® Railings won't splinter or lose strength from rotting over time, like wood can.

Why trust your family's safety to anything less?

— BE YOU —

# Customize Your World Outdoors

Thanks to our modular design, you can customize colors and add a personal touch to your RailWays® Universal Railing. Choose traditional combinations, or mix it up with different colored handrails and balusters, including metal. Add our hidden lighting system to extend your outdoor living.

The choice is all yours.
